

June 28, 2005

Dear Sirs & Madams,

Enclosed are 1268 signatures 707 on line, 559 on paper petitions asking the Secretary of State to ***NOT*** certify Diebold TSx and GEMS software for use in California and to invoke the California Elections Code §192104.5 to ban Diebold from elections in California for 3 years.

Jerry Berkman

510 547-0985

## Petition to the California Secretary of State

As Diebold has misled the State of California many times in the past and has provided uncertified software for use in elections, and as the use of Diebold equipment has disenfranchised voters by forcing late opening of polls in the March, 2004 election, and as Diebold's proposed paper trail is costly, unsuitable for recounts, and does not protect the confidentiality of the voters because it preserves the order in which ballots were cast,

Be it resolved that in order to protect the integrity of elections in California, restore citizen confidence in the electoral system, and provide transparency to the electoral system, the Secretary of State must not certify Diebold Election Systems for use in California. Further, as authorized by section 192104.5 (a) (3) of the California Elections Code, the Secretary of State must ban Diebold from doing any elections-related business in the state for three years.

In addition, counties with existing Diebold equipment should evaluate alternatives for compliance with the Help America Vote Act of 2002 and the California Elections Code rather than solely negotiating upgrades to existing Diebold systems.

## Petition to the California Secretary of State

Note - the Secretary of State has extended the date for public comment, to June <sup>OK</sup> 30, so please keep urging your friends to sign this petition.

As Diebold has misled the State of California many times in the past and has provided uncertified software for use in elections, and as the use of Diebold equipment has disenfranchised voters by forcing late opening of polls in the March, 2004 election, and as Diebold's proposed paper trail is costly, unsuitable for recounts, and does not protect the confidentiality of the voters because it preserves the order in which ballots were cast,

Be it resolved that in order to protect the integrity of elections in California, restore citizen confidence in the electoral system, and provide transparency to the electoral system, the Secretary of State must not certify Diebold Election Systems for use in California. Further, as authorized by section 192104.5 (a) (3) of the California Elections Code, the Secretary of State must ban Diebold from doing any elections-related business in the state for three years.

In addition, counties with existing Diebold equipment should evaluate alternatives for compliance with the Help America Vote Act of 2002 and the California Elections Code rather than solely negotiating upgrades to existing Diebold systems.

## Petition to the California Secretary of State

As Diebold has misled the State of California many times in the past and has provided uncertified software for use in elections, and as the use of Diebold equipment has disenfranchised voters by forcing late opening of polls in the March, 2004 election, and as Diebold's proposed paper trail is costly, unsuitable for recounts, and does not protect the confidentiality of the voters because it preserves the order in which ballots were cast,

Be it resolved that in order to protect the integrity of elections in California, restore citizen confidence in the electoral system, and provide transparency to the electoral system, the Secretary of State must not certify Diebold Election Systems for use in California. Further, as authorized by section 192104.5 (a) (3) of the California Elections Code, the Secretary of State must ban Diebold from doing any elections-related business in the state for three years.

In addition, counties with existing Diebold equipment should evaluate alternatives for compliance with the Help America Vote Act of 2002 and the California Elections Code rather than solely negotiating upgrades to existing Diebold systems.

## Petition to the California Secretary of State

As Diebold has misled the State of California many times in the past and has provided uncertified software for use in elections, and as the use of Diebold equipment has disenfranchised voters by forcing late opening of polls in the March, 2004 election, and as Diebold's proposed paper trail is costly, unsuitable for recounts, and does not protect the confidentiality of the voters because it preserves the order in which ballots were cast,

Be it resolved that in order to protect the integrity of elections in California, restore citizen confidence in the electoral system, and provide transparency to the electoral system, the Secretary of State must not certify Diebold Election Systems for use in California. Further, as authorized by section 192104.5 (a) (3) of the California Elections Code, the Secretary of State must ban Diebold from doing any elections-related business in the state for three years.

In addition, counties with existing Diebold equipment should evaluate alternatives for compliance with the Help America Vote Act of 2002 and the California Elections Code rather than solely negotiating upgrades to existing Diebold systems.

As Diebold has misled the State of California many times in the past and has provided uncertified software for use in elections, and as the use of Diebold equipment has disenfranchised voters by forcing late opening of polls in the March, 2004 election, and as Diebold's proposed paper trail is costly, unsuitable for recounts, and does not protect the confidentiality of the voters because it preserves the order in which ballots were cast,

Be it resolved that in order to protect the integrity of elections in California, restore citizen confidence in the electoral system, and provide transparency to the electoral system, the Secretary of State must not certify Diebold Election Systems for use in California. Further, as authorized by section 192104.5 (a) (3) of the California Elections Code, the Secretary of State must ban Diebold from doing any elections-related business in the state for three years.

In addition, counties with existing Diebold equipment should evaluate alternatives for compliance with the Help America Vote Act of 2002 and the California Elections Code rather than solely negotiating upgrades to existing Diebold systems.
